

Panel with elements of machines and mechanisms - gears, pulleys and jagged bars

## **EQ268A**

## **Function**

It is geared towards the study of pulleys, gears, jagged bars, racks and pinions, levers, mechanical advantage, mechanical power, moment of force, rigid body's equilibrium, (kinematics of rigid bodies: 2D movement, rigid body's rotation: kinematic of rotations), (rotation dynamics: conservation of angular momentum, moment of inertia).

## **Knowledge areas**

Physics

## Level

Graduation - Technical education
